SUMMARY

M.Sc.-trained microbiology researcher with over four years of laboratory experience in molecular microbiology, bacteriophage research, and undergraduate teaching laboratories. Experienced in microbiological techniques, aseptic technique, sample preparation, laboratory safety, and regulated waste handling in BSL-2 environments. Skilled in maintaining organized laboratory workflows, following SOPs, troubleshooting equipment, and supporting quality-focused laboratory operations. Currently expanding industry knowledge through GMP and bioinformatics, and data analysis training.

SKILLS

- | | | |
|--|---|--|
| • Experimental design and data analysis | mentorship | laboratory documentation |
| • Microbial culturing and aseptic technique | • Strong written and verbal communication skills | • Quality control and laboratory testing |
| • Laboratory safety, incident reporting, and incident investigations | • Proficient in Microsoft Office | • Laboratory equipment operation and troubleshooting |
| • Report and academic writing | • Attention to detail and organizational skills | • Inventory management and laboratory organization |
| • Teaching, training, and student | • Regulated chemical and biohazard waste handling | |
| | • SOP compliance and | |

WORK EXPERIENCE

Graduate Research Assistant | *University of Calgary*

May 2021 – Aug 2025

- Conducted independent **microbiology** and **molecular biology** research in a **BSL-2 laboratory** environment
- Prepared microbiological media, reagents, buffers, and laboratory solutions according to established protocols
- Collected, processed, and analyzed biological samples while maintaining strict **aseptic techniques** and contamination control procedures
- Performed **bacterial culturing**, microbial isolation, and routine laboratory testing to support research objectives
- Operated and maintained laboratory equipment including **incubators**, **centrifuges**, **ultracentrifuges**, **PCR thermocyclers**, **NanoDrop**, **Qubit**, gel electrophoresis systems, and imaging equipment
- Prepared and analyzed biological samples using **DNA extraction**, **PCR**, **electrophoresis**, and sequencing workflows
- Recorded, organized, and interpreted experimental data while maintaining accurate laboratory documentation
- Followed laboratory **SOPs**, safety procedures, and quality standards in daily operations
- Managed laboratory inventory, prepared supplies for experiments, and assisted in maintaining an organized laboratory environment
- Handled and disposed of **biohazardous** and chemical waste in accordance with laboratory safety requirements
- Collaborated with supervisors and laboratory members to plan experiments, troubleshoot procedures, and meet project deadlines

Graduate Teaching Assistant | *University of Calgary*

2021 – 2025

- Courses Taught:
 - * CMMB 343 – Microbiology (Winter 2022, Winter 2025)
 - * BIOL 311 – Principles of Genetics (Fall 2022, Spring 2023, Fall 2023)
 - * BIOL 241 – Energy Flow in Biological Systems (Fall 2021)
- Delivered laboratory instruction in **microbiology**, **genetics**, and **molecular biology** to undergraduate students
- Trained students in microbiological and molecular biology techniques including **aseptic technique**, **microscopy**, **DNA extraction**, **PCR**, and **gel electrophoresis**
- Supervised laboratory activities and ensured compliance with laboratory safety procedures and protocols
- Assisted students with **experimental design**, data collection, analysis, and interpretation of results
- Troubleshooted laboratory procedures and equipment issues to support successful completion of experiments
- Evaluated laboratory reports, assignments, and practical exercises while providing constructive feedback
- Supported the preparation and organization of laboratory materials, reagents, and equipment for teaching laboratories
- Developed strong **communication**, **leadership**, and **mentoring** skills through instruction of diverse student groups

EDUCATION

University of Calgary

Master of Science (M.Sc.), Biological Science - Molecular Microbiology

May 2021 - Aug 2025

GPA: 3.5/4.0

Islamic Azad University of Iran

Bachelor of Science (B.Sc.), Cellular and Molecular Biology, Specialization in Genetics

2012 - 2016

GPA: 3.4/4.0

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

– eLearning Foundations of GMP

- * Quality Risk Management
- * Medicinal Products
- * Active Pharmaceutical Ingredients (API)
- * Deviations, Root Cause Analysis (RCA) Tools and Corrective and Preventive Actions (CAPA)
- * Validation
- * Qualification of Facilities, Equipment, and Utilities

– R Wizardry Course

– Harassment and Violence Awareness

– Occupational Health and Safety Orientation

– Hazard Assessment

– Incident Reporting and Investigation

– WHMIS 2015: *Workplace Hazardous Materials Information System*

– Spill Response

– Laboratory Safety

– Introduction to Cybersecurity

– Privacy Awareness

– Biosafety (Program)

PRESENTATIONS AND CONFERENCES

- **Oral Presentation:** “Isolation and Characterization of Rhizobial Phages” – 8th Annual BGSA Symposium, 3-Minute Talk Section
- **Poster Presentation:** Canadian Society of Microbiologists (CSM) Annual Conference, Halifax, NS (2023)
- **Poster Presentation:** Canadian Society of Microbiologists (CSM) Annual Conference, London, ON (2024)
